

## WE DON'T PUMP THE BRAKES

Efficient performance is what GLMV's Automotive Division brings to the winner's circle. Our team specializes in designing and managing a wide variety of automotive facilities, from full-service auto body shops and convenience stores to car dealerships, recharging stations, and car washes. These projects are powered by delivering exceptional performance, collaboration, and premium customer service. Our approach emphasizes collaboration, enabling us to provide efficient and confident design by a team of seasoned professionals.

## The Map to Success

Licensed in 48 states, our Automotive Division is known for innovative and unique quality-driven roadways to every project. We consider all vital elements for successful completion, including consultant coordination, site optimization, construction phasing, client input, code compliance, permitting, and construction oversight. With a thorough diagnostic provided by our quality management process, our team ensures that details are carefully considered and executed. At the heart of our approach is a strong emphasis on client satisfaction achieved by prioritizing a deep understanding of the client's needs and goals. Our goal is to deliver you a quality project on time and within budget. This client-focused approach has earned our team a reputation for excellence and has allowed us to maintain long-lasting relationships with clients well down the road.
